

## 1 **Breathable, Dual-Action Cooling Copper Cover**

Our signature cover is designed with real copper fibers that help dispel heat, plus innovative cooling technology. Heat-absorbent polyethylene fibers wick excess body heat away to promote your coolest sleep.

## 2 **Therapeutic Gel-Infused Memory Foam with ActiveCool**

Four inches of CertiPUR-US® Certified gel memory foam contours to your every curve and offers pressure-relieving support. Phase change material dynamically reacts to your body's changing temperature so you can stay comfortable.

## 3 **Dynamic Response Layer**

Three inches of conventional CertiPUR-US® Certified foam provides support while allowing airflow, plus crucial rebound and bounce. This responsive foam layer helps promote better spinal alignment.

## 4 **ActiveSupport Stability Base Layer**

Seven inches of conventional CertiPUR-US® Certified foam ensures structure so the layers above it perform at their peak. This durable layer is the foundation for better sleep.

## 5 **Shift Resistant Lower Cover**

The soft stitchbond polyester cover helps the inner core of your mattress stay in place, and prevents each of the layers from shifting on top of each other.

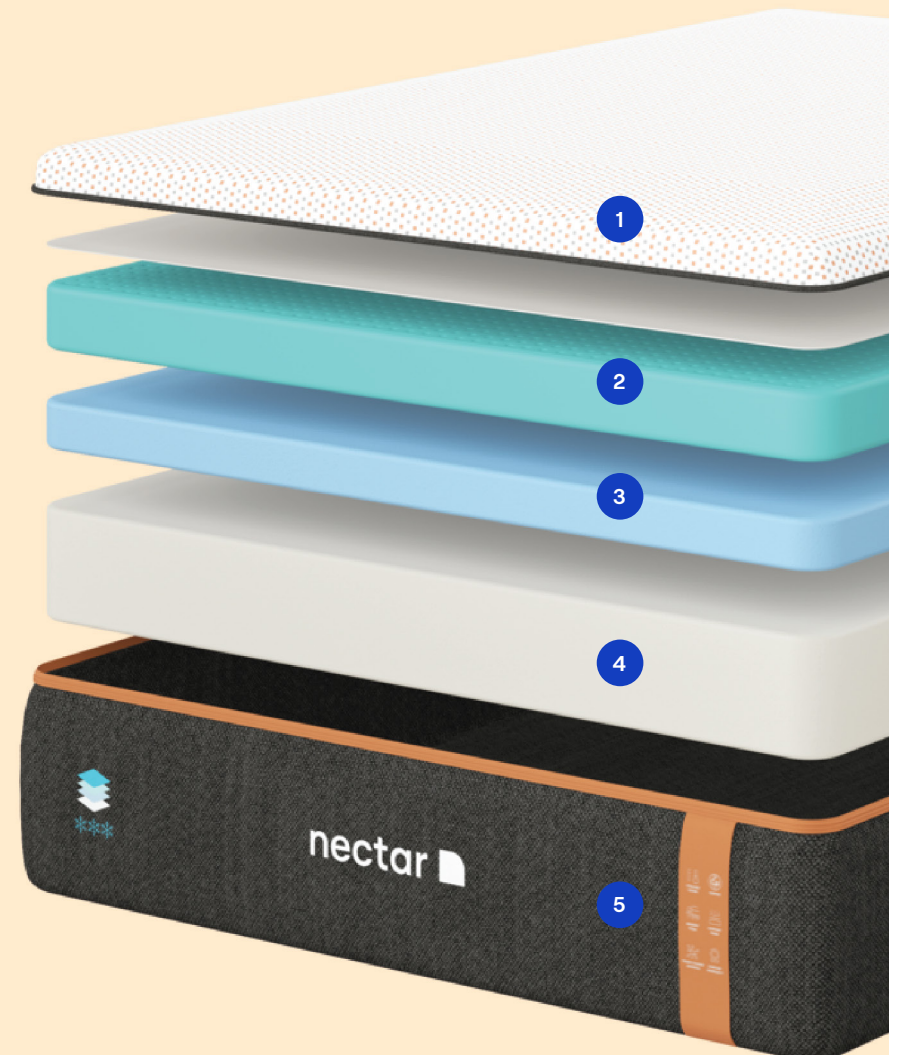

### **CertiPUR-US® Certified**

Our foams meet CertiPUR-US® standards for content, emissions, and durability, and are analyzed by independent accredited testing laboratories. All of our foams are free of ozone depleters, PBDEs, TDCPP or TCEP flame retardants, mercury, lead, heavy metals and formaldehyde.
